Bruce and Dan,

Below are the topics tentatively planned for the NMP portion of the November training. Please let me know if there is a specific topic or issue related to NMPs that you would like included in Caitlin's presentations by Tuesday, November 2.

Nine Minimum Measures

Approaches for Writing Nine Minimum Measures as NPDES Permit Terms (I asked Caitlin to focus on GPs since Illinois typically does not issue IP)

State Technical Standards -- this presentation will touch on EPA's national review of all State Technical Standards, status of review, next steps and some outcomes

Regulatory Requirements for NMP Terms -- this presentation will go through the Linear and Narrative Rate Approaches

We are also hoping to include samples of NMP review checklist, sample general permit with NMP, NMP record keeping forms and calendar for reporting requirements.

Caitlin asked how much detail Illinois would like included on the Phosphorus Index. Please let me know what level of detail you'd like on this topic so Caitlin can plan accordingly.

I can't meet with Steve until the week of November 7 to finalize EPA's presentations so feel free to let me know of any topics you'd like included and I'll bring them to Steve's attention when we meet in November.

Thanks,
Julianne
